

## Standard MANOSKOP® torque wrenches w. permanently installed ratchet

### 721/15 Quick

Art.No. 50204015  
GTIN 4018754268924  
Model 721/15 QUICK

**Label.** Torque wrench MANOSKOP No. 721/15 Quick Measuring-R. 30-150N·m Output 1/2" L. 452mm

- Features.**
- click-type
  - the measuring element is only under load while force is being applied, no need for manual reset to zero
  - rapid setting thanks to easy-action locking lever in the handle
  - ergonomically designed, non-slip adjuster with a thumb recess
  - dual stop signal
  - twin scales N·m/ft·lb
  - optimised convex handle for strain-free working
  - any force applied to the tool after the 'click' or applied in the opposite direction to the current function – e.g. forcible loosening of a jammed screw - does not act on the trigger mechanism and cannot cause damage to it
  - all the sensitive components are protected by the sturdy tubular steel housing
  - calibration using perfectControl® calibrating unit No 7794 or calibration system No 7706. Readjustment does not require disassembly
  - certificate in accordance with DIN EN ISO 6789-2:2017
  - **display deviation value  $\pm 4\%$**

## Advantages.

Made in Germany – STAHLWILLE release torque wrench, ratchet with punch square, length 452 mm, with calibration certificate (DIN EN ISO 6789-2:2017), 50204015.

Lightning-fast and precise torque adjustment.

Patented, low-wear release system with bending rod.

Continued loading after release or loading in the opposite functional direction will not damage the torque wrench.

## Product highlights.

### Flexible rod principle.

Mechanical torque wrenches from STAHLWILLE have a wear-resistant trigger system with a flexible rod. In contrast to conventional torque wrenches with spiral springs, the STAHLWILLE system eliminates one key work step: once the fastener has been tightened, it is not necessary to reset the wrench to »0«.

### Wear-resistant.

Wear resistant trigger system with a flexible rod. In contrast to conventional torque wrenches, it is not necessary to reset the wrench to zero after each job to unload the spring. In this way, users benefit from long-term accuracy and safe measurement results with less time required.

### Fast.

Rapid setting thanks to the easy-action locking lever in the handle. Ergonomically designed, non-slip adjuster with a thumb recess for fast, safe setting of the slider.

### Simple.

Quick adjustment from outside, no disassembly of the torque wrench required, with two adjustment points for the maximum & minimum values.

## Technical Drawing.

## Technical Attributes.

Output square drive outside (inch)	1/2"
b1	28 mm
b2	41 mm
Size	15
Height mm (h1)	23 mm
Height mm (h2)	18 mm

## Logistics data.
